**PART A**

**1. 救生设备使用培训 Life saving equipment operation training**

- |                                                                       |                                     |                             |                                     |
|-----------------------------------------------------------------------|-------------------------------------|-----------------------------|-------------------------------------|
| 1.1 Embarkation, release and recovery of lifeboat (Incl. rescue boat) | <input checked="" type="checkbox"/> | 1.2 Life boat equipments    | <input checked="" type="checkbox"/> |
| 1.3 Operation of life raft                                            | <input checked="" type="checkbox"/> | 1.4 Life saving signals     | <input checked="" type="checkbox"/> |
| 1.5 Life jackets immersion suit and life buoy                         | <input checked="" type="checkbox"/> | 1.6 Life throwing appliance | <input checked="" type="checkbox"/> |
| 1.7 Others:                                                           |                                     |                             | <input type="checkbox"/>            |
|                                                                       |                                     |                             | <input type="checkbox"/>            |

**2. 消防设备使用培训 Fire fighting equipment operation training**

- |                                                                                             |                                     |                                                             |                                     |
|---------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------------------------------|-------------------------------------|
| 2.1 All types of portable fire extinguishers                                                | <input checked="" type="checkbox"/> | 2.2 Fixed fire extinguishing system (CO <sub>2</sub> /Foam) | <input checked="" type="checkbox"/> |
| 2.3 Fireman outfit (Incl. clothing, helmet mask, gloves, lamp, safety line, breathing set.) | <input checked="" type="checkbox"/> | 2.4 Emergency escape breathing device (EEBD)                | <input checked="" type="checkbox"/> |
| 2.5 Other equipments (Fire pump, fire hose, fire axe)                                       | <input checked="" type="checkbox"/> | 2.6 Gas detectors                                           | <input checked="" type="checkbox"/> |
| 2.7 Others: Anti-chemical clothes                                                           |                                     |                                                             | <input type="checkbox"/>            |
|                                                                                             |                                     |                                                             | <input type="checkbox"/>            |

**PART B**

**3. 海上救生培训 Survival at sea training**

- |                                                      |                          |                                                                   |                          |
|------------------------------------------------------|--------------------------|-------------------------------------------------------------------|--------------------------|
| 3.1 Ship operation and maneuverings to man overboard | <input type="checkbox"/> | 3.2 Low temperature protection                                    | <input type="checkbox"/> |
| 3.3 Medical care to person survived on board         | <input type="checkbox"/> | 3.4 Attention for using of life saving appliances in poor weather | <input type="checkbox"/> |
| 3.5 Others:                                          |                          |                                                                   | <input type="checkbox"/> |
|                                                      |                          |                                                                   | <input type="checkbox"/> |

**4. 其他应急知识培训 Other emergency knowledge training**

- |                                             |                          |                                                        |                          |
|---------------------------------------------|--------------------------|--------------------------------------------------------|--------------------------|
| 4.1 Kinds of fire, methods of fire fighting | <input type="checkbox"/> | 4.2 Anti-fire knowledge and fire patrol                | <input type="checkbox"/> |
| 4.3 Medical care to survivors               | <input type="checkbox"/> | 4.4 Operation of radio communication and walkie-talkie | <input type="checkbox"/> |
| 4.5 Others:                                 |                          |                                                        | <input type="checkbox"/> |
|                                             |                          |                                                        | <input type="checkbox"/> |
|                                             |                          |                                                        | <input type="checkbox"/> |
|                                             |                          |                                                        | <input type="checkbox"/> |

培训效果的评价 Evaluation of training effectiveness: satisfied

船长 (签名) Master

- Remark:
- (1) A部分的培训应在船员上船后14天内进行The trainings of part A shall be completed within 14 days after the crew signed on the vessel.
  - (2) B部分的培训应在船员上船后1个月内进行The trainings of part B shall be completed within one month after the crew signed on the vessel.
  - (3) A和B部分应在任何2个月内全部包括The trainings of both Part A and Part B shall be completed once every two months.
  - (4) 所有的培训应由三副记入航海日志All trainings shall be recorded in "Deck Log Book" and filed by the third officer.

- Note:
1. 每次培训后记录To be completed every time
  2. 在船保存3年 To be filed in ship's file for 3 years
