

— TAKUDA CASIAS

I arrived to the parking lot at 6:00am (PST), came to the office had meeting on what our jobs were. I was on second deck out-side chipping at the carpet paint around 6:25am using the air compressor on top-deck. 10:30am ish I happened to see DARREN, John B. running to the boat as I turned around big cloud of black smoke came blasting out of the front doors. I then to proceed to run down stairs for all the fire extinguisher I could find ran back up the stairs and proceeded to spray each one at a time toward the fire, as they did not help as much. Then proceed to grab a water hose to then continue to try to douse the flame until the fire department kick all of us out. About 11:00am I had jumped onto a Jet-Ski to help set the boom up around the Queen to contain anything toxic from spreading. After the boom had been set continued to shore then had a meeting with the crew on making sure everyone was safe and no medical attention was needed. Around 12:00pm (PST) I was dismissed to go home as I had left.
