

I Arrived to the end of dock approx
7:55 am Tues. 15th Aug. 2016. I saw
smoke coming from 2nd deck door
way. I ran up stairs attempted to
enter but the smoke was too heavy.
I began evacuating workers from
third deck. I then called 911. I
then attempted to use fire hose from
Dixie but boat was locked. I then
move remaining worker from the
end of pier. Once the fire dept.
arrived I got permission to
move the Dixie. Soad, myself, Rife,
moved the boat off shore waited
for a relief capt. Then we returned
to shore began deploy the boom
to contain the debris from the fire
