### PSC FOLLOW-UP REPORT

After a PSC inspection the ship has been detained in the port of Gibraltar. The vessel has been attended as per Owner's request and according to the ITS II-A11-1. Inspection has been started on 11/07/2016 and has been completed on 14/07/2016. With reference to the PSC report deficiencies list as per attached form B/1, the following has been carried out:

Item	Deficiency description	PSC Group Code	Action taken by PSC (specify code)	Deficiency rectified before departure (specify how)	Deficiency not rectified before departure (specify in this case actions taken such as recommendations issued/conditional certificates issued, other)
1	Auxiliary engines no.1-2-3 not operational.	1310 2	30	A dedicated dock trial has been satisfactorily carried out on D/G no.1 and D/G no.2, including alarms and safety devices. Aux. engines no.1 and no.2 are currently properly working.	Auxiliary engine no.3 is still under maintenance and repairs. Recommendation issued, related to Class Certificate and Safety Passenger, with due date 03/08/2016 has been now issued. Electrical balance onboard verified for compliance with SOLAS II-1 reg 41 of remaining generating set. Bow thrusters have been put temporarily out of service. Under master responsibility tug/tugs assistance is to be called during berthing operation and/or navigation into narrow channels and/or confined waters.
2	Sea water feed pump to auxiliary engines not operational	1319 9	17	Sea water feed pump has been satisfactorily tested and it is now working properly	/
3	General engine room cleanliness insufficient	1842 0	17	Cleanliness of engine room has been improved during inspection and now it is in satisfactory condition. By the way a Class Recommendation has been now issued, in order to keep the cleanliness monitored and have an additional check of cleaning improvement. Due date	/

				of Recommendation will be 17/07/2016 .
