

MEMORANDUM FOR: Leah Yeager, Senior Air Safety Investigator, NTSB

06 Sep 2011

FROM: Christopher Holmes, EGL ALPA Air Safety

SUBJECT: American Eagle Airlines Flight 3224 Recommendations

1. The following are recommendations that members of the Eagle ALPA Air Safety staff have decided upon that could not only benefit our company operations, but our industry as a whole:
 - a. Emphasis placed on airborne weather radar usage during Part 121 long term flight training.
 - b. Enhance aircrew weather situational awareness with up to date reports from not only ATC, but company dispatch as well.
 - c. Emphasis on the usage of the cabin public address system stressing the importance of seat belt use by passengers even during smooth air
 - d. Improved weather radar designs by the manufacturer to enhance/improve aircrew decision making.
2. Please feel free to contact me with any questions.

CHRIS HOLMES, F.O., EMB
EGL ALPA Assistant Chief Accident Investigator
