---

## Memorandum

Date: November 10, 2009  
To: All Operational Personnel  
From: Manager, Columbia ATCT  
Subject: ACTION: 180 Degree Turns On Runways

---

In the latest Airport Facility Directory, the prohibition on 180 degree turns on grooved surfaces (i. e. runways) has been removed. However, the removal was inadvertent. The prohibition is still in effect.

180 degree turns on the runways are not to be authorized or approved. If you have any questions, please see your FLM or Michael Peay.
