

my name is Amanda Carothers  
my co-worker Jackie cherry was  
taking me to the ER we were  
west bound on 285 near exit 31.A  
We were just talking and to my left  
I saw a small white airplane flying  
low. At first I was wondering if  
there was a airport around and  
they were beginning to land. I  
~~Screamed~~  
~~Screamed~~ at my co-worker to watch  
out there was a plane crashing on  
the interstate. The plane crashed  
appx 15 feet in front of us. We were  
almost hit by parts of the plane.  
us as well as everyone else  
started moving to the right of 285  
I jumped out of ~~my~~ <sup>the</sup> car to  
run over even though the plane  
was engulfed in flames. we  
witnessed one of the passengers trying  
to exit the plane but could not.  
I called 911.

Everything happened so fast like  
in a horror movie. It was only  
mins before all medical & emerg.  
people coming to the scene

I was headed eastbound on I-285, getting off Ext 32 onto loop. I saw a small airplane headed south come over I-285. The airplane was low as the highway sign. As I made it to the Ext 32 loop the airplane made a right sharp turn headed eastbound on I-285. The left side of airplane was upright in the air, the right side was facing down to the ground. The airplane went head first in the far left lane next to the wall and crashed and went up in flames.

We (Amanda Casotter and I) were headed west bound on I-285 taking her to Northside Hospital she wasn't feeling well at work. All of sudden to my left an airplane was coming in pretty fast. Amanda yelled at me to stop. I threw on brakes just missing a part of the flying propeller just missed us. I froze - I couldn't move. Amanda started screaming for me to move my car the plane might blow, I was crying and screaming for help I need to call my daughter. I eventually moved over to the far right when I looked over to my left, I saw a man looked as if he was trying to get out smoke was
