

Runway Incursion Between Aer Lingus A330 and US Air B737  
Boston Logan International Airport, Boston, Massachusetts  
June 9, 2005  
NYC05IA095

#### Animation disclaimer/description

This three dimensional animated reconstruction shows the runway incursion incident between an Aer Lingus A330 and a US Air B737 at the Boston Logan International Airport in Boston, Massachusetts on June 9, 2005. The following incident reconstruction displays information from the flight data recorder, recorded radar data, and aircraft performance data. This reconstruction does not depict weather or visibility conditions at the time of the incident.

The animation shows a three-dimensional representation of the airplanes and their motion. The local time of day (based on the FAA's Air Traffic Control radar data), the lateral separation in feet between the right wing tip of the Aer Lingus A330 and the nose of the US Air B737 and the vertical separation in feet between the landing gear of the Aer Lingus A330 and the center of gravity of the US Air B737 are depicted as text.

Still from animation.
