

a) Emergency Notification

The emergency notification procedure for Pipelines operated by the Edmonton Control Centre is as follows:

1. Contact [Regional/District Management <Link>](#)
 - When requested the control center will provide assistance in identifying HCA's and locally controlled isolation valves in the HCA to responding personnel.
 - Contact Houston Gas Control if the incident is on the Vector common ROW.

2. Contact police (unless an employee of the company has personally observed the situation, made an assessment and determined that police assistance is not required for the protection of the public).
 - For Norman Wells Pipeline, contact [police <Link>](#) if the emergency is within a 5 kilometer radius of Norman Wells, Tulita, Wrigley or Ft. Simpson.

3. Contact the [CCO Admin <Link>](#) On-Call or Designate
