Description - [** Comment to Railroad/Company **] Made a hi-rail inspection to look at the overall condition of the track in each direction of Jack Creek (MP 56.72) and to rule out any additional broken rails that could have occurred under the derailling train prior to Jack Creek in the event of a flattened rail wheel. No broken rail were found. The inspection east of the derailment was from MP 54.53 to MP 49.09, while the inspection west was from MP 58.0 to MP 69.34. The portion in between was not inspected because of equipment occupying the track. Overall condition of this portion was: 90lb CWR; anchoring was good with no longitudinal movement, surface is fair for intended FRA Class 3 track; no gage issues were identified; tie condition is poor in many areas.
