Flight Standards District Office

Jackson, MS 39208

Mr. Albert McCray:

On 17 August 2011, I was asked by Mr. David Duncan to dispense fifteen (15) gallons of 100 low lead aviation gasoline into the left tip tank of the Cessna 310 N444YM.

At about 0730 that morning, I positioned the fuel truck in front of the aircraft, and with the assistance of an employee in training, Richard Shaw, I dispensed the requested amount into the specified tank.

This account is complete and accurate to the extent of my remembrance.
