Enclosures

*Notice: If the records contained in the attached package are utilized in trial proceedings, and if you require a records custodian for authentication, be advised Sprint does not have local representatives. Sprint's Trial Team is located at our Corporate Headquarters in Overland Park, Kansas. You will need to contact the Trial Team at CSTrialTeam@Sprint.com or call our office at 913-315-8775. Our office will require at least two-weeks notice in addition to pre-paid travel arrangements by your office.

Sprint L-Site

Sprint has an interactive web tool [for law enforcement](#) known as L-Site. If you are unfamiliar with L-Site and wish to obtain further information, please send an email to: L-Site@Sprint.com.

***Search results indicate one or more of the numbers listed on the above-referenced legal demand may belong to Boost, a Sprint prepaid phone service. Our office maintains subscriber information for Boost accounts, but this information is often inaccurate or incomplete, as no identification is required when purchasing a Boost phone. Payment information is also available for Boost accounts. However, this information, while accurate, may not be complete. As Boost accounts are prepaid, no bill reprints are available. We are able to provide call detail records for IDEN and CDMA Boost accounts for the most recent 18-24-month period.**

Key to Understanding CDMA Call Detail Reports

Calling number:	This column reflects the number placing the call (the individual who initiated the call). If the call is an outgoing call, this will be the Sprint PCS target number.
Called number:	This column reflects the number actually called. In most cases this number will be the same as the number in the "Dialed Digits" column. If the number has been forwarded, or if there is a routing number, then this will be reflected. If the number has a 11 in front of the area code, that means the call rolled to voicemail and was NOT answered by the customer.
Dialed digits:	This column reflects the digits that the caller enters into the keypad of the phone. If the call is an incoming call, this will be the Sprint PCS target number.
M_R #:	Mobile Role (Type of Call). Listed as outgoing, incoming, routed call*or undetermined.
Start Date:	Date and time the call was initiated.
End Date:	Date and time the call was ended.
Duration:	Duration of call, in seconds.
Repoll number:	This reflects which phone switch handled the call.

*Routed calls come in two main varieties. The first, also known as Temporary Local Dialing Number (TLDN). They may be considered to be bridge/router numbers to complete a call. The second is when a call is not answered, but is routed to voicemail. Calls routed straight to voicemail will also have an "11" before the number indicated in the "Called_Nbr" column. For handsets using visual voicemail, these numbers may replace the "11" in the called number column: (800) 877-2400, (866) 677-8204, (866) 222-2604, and (877) 836-4746.

*The CDMA call detail report may indicate the sending and receipt of text messages and e-mail. While not flagged as text messages, the line will indicate no duration, the dialed digits column will either be blank or will show an e-mail address, and the repoll column will contain one of the following numbers: 13; 291-298; 347; 506-532; 681-684; 686-688.

* On the CDMA network, Sprint maintains Gateway and SWAT (Soft Wireless Access Tandem) networks in areas where there are large Sprint customer populations. These provide the required extra space that helps Sprint maintain all of the calls. When a call moves through a gateway or SWAT cell site information is not retained and is not recoverable.

*Please be advised that as of October 12, 2010, all CDMA CDR (Call Detail Record) text message time stamps are kept in Central time zone. Records prior to October 12, 2010 are either in Central or Eastern time zone. Sprint is unable to determine which time zone is reflected in records older than October 12, 2010.

Star Codes

Your request has been fulfilled, at least in part, by what is known as a CDMA CDR Report. A CDMA CDR Report lists information about incoming/outgoing calls including the digits dialed on the handset. As a dialing shortcut, PCS subscribers may use star codes (an asterisk (*) plus a short number sequence) when using our wireless telephones. On call detail reports the star may be indicated by a letter "B". This code will appear in the dialed digits column of the CDMA CDR Report. Following is a list of the most common star codes. Additional star codes may exist in the market from which the call is made. Please contact the Subpoena Compliance Group at the number listed above for more information concerning star codes.

- *18 - Ping the nearest tower, call delivery activate
- *180 - Call delivery deactivate
- *2 - Customer Care
- *3 - Payment Center
- *31 - Three Way Calling
- *4 - Account information
- *5 - Spanish Customer care
- *67 - Caller ID block
- *68 - Override caller ID block
- *70 - Cancel call waiting for that call
- *711 - Customer Care
- *72 - Activates call forwarding
- *720 - Deactivates call forwarding
- *73 - Call forwarding no answer
- *74 - Call forward busy
- *811 - Customer Care
- *82 - Override caller ID block- for that call
- *911 - 911
- *073 - Cancel call forward no answer
- *074 - Cancel call forward busy

Other numbers which may appear in the dialed digits column :

- 411 - Directory assistance
- 611 - Customer Care
- 711 - Telecommunications Relay Service(hearing impaired)
- 911 - Can also dial 0911 or 1911)
- c777 - Web Browsing (SINS)

RECEIVING RECORDS IN ELECTRONIC FORMAT

Your request has been satisfied, at least in part, by records furnished on compact disc (CD) or via e-mail. Sprint uses CDs when the response is particularly voluminous or if records are requested in electronic format. Once "recorded" the CD cannot be deleted, re-recorded or appended. Information on CD is normally in one of three formats:

RICH TEXT FORMAT (RTF)

These files are text files readable by any word processor such as Microsoft Word/Works or WordPerfect. Generally, we use this format for letters, summaries and explanatory documents. To retrieve these documents, open your word processor of choice then use the open file command (normally listed under File in the Window Menu bar). Navigate to the drive containing the CD and double click on the file name. While you may not manipulate the file and re-save directly on the CD, it may be manipulated and re-saved elsewhere.

SPREADSHEET FILES (XLS or CSV)

These files are normally used for longer items such as the call detail reports or a listing of all cell sites associated with a particular switch/repoll. We use Microsoft Excel to generate these files and recommend that product for viewing them. To retrieve these documents, open your spreadsheet program of choice then use the open file command (normally listed under File in the Window Menu bar). Navigate to the drive containing the CD and double click on the file name. These files may be uploaded to products such as PenLink in either CSV or XLS format. Please see your program documentation for assistance. While you may not manipulate the file and re-save directly on the CD, it may be manipulated and re-saved elsewhere.

TAGGED IMAGE FORMAT (TIF or TIFF)

This format is used for stored bills and for print outs from our customer service/billing system. All Windows based machines come with TIF viewers but accessing the viewer software may be unfamiliar. To retrieve these documents, open the My Computer folder on your desktop or Open the Windows Explorer (not Internet Explorer). Navigate to the drive containing the CD and **RIGHT** click on the file name. This will open a menu. Choose "OPEN WITH." A new dialog box will open. Look for applications that do Imaging. The most common are "Imaging", "Imaging Preview", "Microsoft Imaging", "Kodak Imaging" and Microsoft Office Document Imaging." Single click on your choice and also click on the check box which says, "Always use this program to open these files." This will set the program as your default and next time you need to open a TIF file, you may just double click on the desired document. Once open, most TIF viewers only display the current page. To go to the next page, use the page up/down keys on your computer keyboard or look for helper arrows. You may also wish to peruse the Help feature offered in every Windows based program. Please note: these files may not normally be uploaded to products such as PenLink since they are not open for manipulation. Please see your program documentation for assistance.

You may also receive files in a bundled, WinZip format (ZIP). These files contain other files (of the three types listed above). Zipped files are used to save space on particularly large requests. To open a ZIP file, open the My Computer folder on your desktop or Open the Windows Explorer (not Internet Explorer). Navigate to the drive containing the CD and double click on the file name. If this does not work, return to the folder containing your document and **RIGHT** click on the file name. This will open a menu. Choose "OPEN WITH." A new dialog box will open. Look for applications that do zipping. The most common is "WinZip." Single click on your choice and also click on the check box which says, "Always use this program to open these files." This will set the program as your default and next time you need to open a ZIP file, you may just double click on the desired document.

Please feel free to contact the Sprint Subpoena Compliance Department for further assistance: 913-315-0660 or 866-259-7534.
