### The M3X - General Description

We took our Mark III Classic, added the aerodynamic expertise BarnabyWainfan, threw in a dash of ergonomics and t out with the Mark III Xtra while retaining the excellent STOL performance of the Classic. The Mark III Xtra, along wi Kolb aircraft, has folding wings and tails which allows for easy set-up and take-down. The tail folds up and the wings back. The process can be done in about 15 minutes. No tools or brackets are required. Everything stores right on airframe.

The Mark III Xtra comes with a state of the art assembly manual. The manual includes 3D illustrations, technical draw and step-by-step procedures.

---
