FEDERAL HIGHWAY ADMINISTRATION

CERTIFICATE

MC 319061 C

ASSOCIATED WHOLESALE GROCERS, INC.

KANSAS CITY, KS, US

This Certificate is evidence of the carrier's authority to engage in transportation as a **common carrier of property (except household goods)** by motor vehicle in interstate or foreign commerce.

This authority will be effective as long as the carrier maintains compliance with the requirements pertaining to insurance coverage for the protection of the public (49 CFR 387), and the designation of agents upon whom process may be served (49 CFR 366). The carrier shall also render reasonably continuous and adequate service to the public. Failure to maintain compliance will constitute sufficient grounds for revocation of this authority.

Thomas T. Vining  
Chief, Licensing and Insurance Division

**NOTE:** Willful and persistent noncompliance with applicable safety fitness regulations as evidenced by a DOT safety fitness rating of "Unsatisfactory" or by other indicators, could result in a proceeding requiring the holder of this certificate or permit to show cause why this authority should not be suspended or revoked.

Your account has been reviewed and credentials cannot be issued until the items listed below are filed with this agency. If you have questions about your account or any of the information listed below, you may contact our agency at 866-831-6277 between the hours of 7:30 a.m. and 4:00 p.m.

Comments:

The Federal Motor Carrier Safety Regulations require motor carriers to update their MCS-150 census information before your license plate renewal can be processed.

Option: Go on-line at <http://www.safer.fmcsa.dot.gov> to update your information and return this letter to Motor Carrier Services marked as: Updated.

Or:

Option 2: Complete the attached MCS-150 form and return to Motor Carrier Services to update.

155 records found. Showing page 1 of 2. Page 1

\* The moving violation indicator is based on Roadside Inspection reports. Some moving violations are reported when a Roadside Inspection was performed following a traffic stop for the moving violation. These reported violations do not always result in the issuance of a citation to the driver.

CAUTION: Please verify important data before relying on SafeStat results. Inaccurate or out-of-date normalizing data can result in SafeStat results that do not accurately reflect the motor carrier's safety status.

United States Department of Transportation - Federal Motor Carrier Safety Administration

Inspection Selection System (ISS-D) Recommendation*	
(As of May 22, 2009)	
Carrier Name: ASSOCIATED WHOLESALE GROCERS INC US DOT #: 90053 MC #: 319061	
ISS Inspection Value:	67
ISS Recommendation:	OPTIONAL
Basis for Recommendation:	Safety

**New Entrant carriers may be selected for inspections at anytime.**

\* The ISS-D monthly run evaluates carriers' recent inspections activity. The ISS results are generated along with SafeStat on a monthly basis and are posted on A&I Online.

## The Inspection Selection System (ISS-D)

The Inspection Selection System (ISS-D) is a decision-aid for commercial vehicle roadside driver/vehicle safety inspections, which guides safety inspectors in selecting vehicles for inspection.

**ISS Inspection Value:** The ISS Inspection Value is based on the motor carrier's safety performance data. In the case when there is sufficient motor carrier safety performance data available, the value is assigned from information derived from SafeStat results, which reviews safety performance in areas of crash history, inspection history, driver history, and safety management experience. When a motor carrier has little information on file, the ISS Inspection Value is based on an 'Insufficient Data Algorithm', which determines the inspection value by weighting the carrier size and the number of past inspections. Refer to the Inspection Selection System description, for an explanation of the value's calculation.

**ISS Recommendation:** The ISS Inspection Value forms the basis for the ISS recommendation. The recommendation ranges from 'Inspect', for motor carriers with poor safety performance in one or more Safety Evaluation Areas (SEAs) and for carriers with little or no safety data, to 'Pass' for carriers with good safety performance data. The three recommendations listed are below.

Recommendation	ISS Inspection Value
<b>Inspect</b> ( <i>inspection warranted</i> )	75-100
<b>Optional</b> ( <i>may be worth a look</i> )	50-74
<b>Pass</b> ( <i>no inspection required</i> )	1-49

**Basis for Recommendation:** The Basis for Recommendation describes the method that was used to calculate the ISS Inspection Value. There are two methods for calculating an ISS inspection value:

- The "**Safety**" method assigns this recommendation based on SafeStat results, which applies to carriers with sufficient safety performance data.
- The "**Insufficient Data**" method is based on an 'Insufficient Data Algorithm', which applies to carriers that have little or no safety performance data available.

[Click here](#) to access the Inspection Selection System description, a system designed to prioritize carriers for roadside inspection. This link defines "How ISS-D works".
