5083 Airport Road Midland, VA 22728 (540) 788-9300

Dec 30, 2010 Reg # N32396 Serial # 28-7525060 Tach: 4876.7 TTAF 4876.7

I certify that this aircraft was inspected in accordance with my personal checklist made from Piper 100 Hour Inspection Form as a reference and was determined to be in airworthy condition. Lubed in accordance with manufactures chart. Checked all placards in place. Changed Bracket Air Filter PN BA-3. ELT inspected in accordance with CFR 91.207 - Ops check satisfactory. Replaced ELT battery with new Duracell MN1300. Battery replacement is required upon reaching the date marked on each cell. Although not required, the manufacturer strongly recommends that the batteries be replaced on a yearly basis. Remove unit battery due in 8 years from 2/2002 for a lithium batter and 4 years for an alkaline battery. Replaced landing light wire insulation. Repaired wire insulation behind #4 cylinder. Replaced brake linings. Replaced brake rotors, Replaced wheel bolts. Replace main tires and tubes. Complied with AD2010-15-10 Control Wheel Shaft by inspection per Piper SB 1197C (Nov 8, 2010, ref attached FAA letter dated Nov 17, 2010) and found to be airworthy.

William P. Kusming

I certify that this aircraft was inspected in accordance with CFR 43, Appendix D and was determined this aircraft to be in airworthy condition. IFR certification due August 2010. Complied with AD 76-7-12 in accordance with Para A., B. and C – Ops check OK. Complied with AD 95-26-13 by inspecting in accordance with (1) (2)(1)(1) - OK, Complied with AD 99-24-10 in accordance with Para (b)(1)(2) - OK.

## CORRECTIVE ACTION

Customer states that cylinders have four hundred and twenty hours since last overhaul and wants cylinders returned in service limits, not overhauled to new limits. Disassembled, cleaned and inspected cylinders. Installed all new exhaust guides and two new intake guides. Reamed guides to size. Cut valve seats. Resurfaced two exhaust flanges and installed four new exhaust studs as needed. Honed barrels-(P.010) for ring installation. Cleaned and inspected valves, valve springs, and spring retainers. Replaced all worn valve springs with new springs. Polished and refaced valves-(Serviceable). Hand lapped valves. Assembled cylinders with new valve springs and all new valve keys. Pressure tested valves-80/80. Cleaned and inspected all rocker arms, rocker shafts, pistons, and piston pins. Replaced all worn rocker shafts with new shafts. Installed three new rocker arm bushings and reamed bushings to size. Resurfaced rocker arm toes. Fit new P.010 rings to cylinders and P.010 pistons-(P/N AEL750789 P.010). Painted cylinders grey.

ETER SIGNATURE & CERTIFICATE NO. OF PERSON PERFORMING WORK DATE TOTALS brought forward from previous page Ser# 28-7525060 Tach: 4981.23 TTAF: 4981.23 TTSMOH: 539.09 May 2, 2014 Reg# N32396 I certify that this engine was inspected in accordance with a 100-Hour Inspection using my personal checklist derived from the Piper Service Manual (PSM) 100 Hour Inspection Report and was determined to be in Airworthy Condition. Cleaned engine and bay. Replaced oil filter, Tempest AA48110 and serviced engine with Phillips XC 20W50 oil. Oil analysis (AOA, 15Apr2014) showed normal results. Replaced all spark plugs with new Tempest UREM40E. Removed right magneto (Slick 4370, S/N 01090050) to facilitate 500 hour inspection conducted by Quality Aircraft Accessories (QYIR334Y). Replaced magneto and timed to 25 deg BTDC per PSM. Replaced missing nut #2 cyl primer line support. Replaced missing nut #3 cyl exhaust stud. Replaced broken safety wire on carb heat box. Retorqued engine air intake, exhaust, and oil-return lines. Ran engine, accomplished leak checks, idle RPM, Mixture, and static power checks: satisfactory. Compression check: #1: 73/80 #2: 73/80 #3: 76/80 #4: 70/80 William P. Rushing I certify that this aircraft was inspected in accordance with an Annual Inspection using CFR 43, Appendix D and Piper Annual Inspection Form as a reference and determined this aircraft to be in airworthy condition. N32396 7/22/2014, TAC 5045.35, Hobbs 182.7 Drained old oil out and replaced oil with Phillips 20W 50 6 Quarts. Replaced oil filter with factory brand oil filter AA48110-2 and installed safety wire on the filter. Ran up the aircraft and checked for visual leaks. No leaks were detected at this time. Candace M.
