

EMERGENCY EGRESS PROCEDURE FOR WINDOWS ON 92d ICC's

-MP-47 page will reflect each window by location for each car.

-When performing the Egress Test on a window, the window is to be fully removed and then re-applied.

-Inspectors are to inspect and renew rubbers if and when necessary. (It is NOT a wholesale change out).

-If defects or repairs are required during the Egress Test, they must be documented in the MP47's.

LUBRICANT SILICONE SPRAY 16 OUNCES PER CAN
12 CANS
