

National Transportation Safety Board

Memorandum

Date: June 28, 2010

From: Timothy W. Monville, ERA

Subject: Toxicology and Breath Alcohol Testing concerning ERA09IA140

On the day after the incident, the pilot submitted a urine specimen for drug testing, which was performed by Medtox Laboratories. NTSB review of the toxicology report revealed the results were negative for amphetamines, cocaine, opiates, phencyclidine (PCP), and marijuana.

He also submitted to breath alcohol testing on January 23, 2009, at 1534; the results were negative.
