

MEMORANDUM FOR RECORD

Jay Neylon
Air Safety Investigator
Eastern Region Aviation

Date: December 28, 2012
NTSB Accident Number: ERA13LA021
Emailed received from: David Hays, Memphis FSDO

Narrative:

On December 28, 2012, I received an email from David Hays concerning examination of the maintenance logbooks of the OH-58A involved in ERA13LA021. Below is a summary of his email:

Inspector Hays performed an examination of the helicopter airframe and associated systems during his investigation. He found no signs of abnormalities or any other issues of concern. He also performed an examination of the maintenance records and found no discrepancies. In his opinion, the aircraft had been maintained very well prior to the accident.
