

Weather Data

WPR14FA286
N5816B
Cessna 182
Fall City, WA
July 8, 2014

Surrounding weather reporting facilities revealed the following:

KSEA 081453Z 03006KT 10SM CLR 20/14 A3008
KRNT 081453Z 31006KT 10SM CLR 19/16 A3006
KPAE 081453Z 01003KT 10SM CLR 16/13 A3008
KAWO 081535Z AUTO 00000KT 10SM CLR 17/14 A3008
KBFI 081453Z AUTO 00000KT 10SM CLR 19/13 A3007

NOTE:

All airport/reporting facilities in the surrounding area indicated clear sky conditions with light winds.

The airport that the accident airplane departed from was about one-half mile from the departure end of the runway the pilot used to depart from; the golf course bordered the east side of the river. Individuals playing golf that morning and at the time of the accident reported a low cloud ceiling, and that the fog was such that the tree-tops were obscured due to the low visibility.
