**Subject:** Alagasco pipe replacement update

Ravi,

I am pleased to report to you that Alagasco completed the replacement of the cast iron distribution system in the Marks Village community today. Since the work began in February, we replaced over 20,000 feet of main and all of the services in the community. All of our customers there are now being served from the new plastic distribution system.

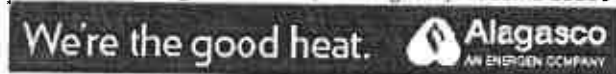

I will be uploading some additional information to the FTP site for your review later today. If you have any questions, please contact me.
