Flight Plan from AirCom

OCC had flight plan displayed from AirCom – 4 segments

1. Globe base to Cobre Valley Community Hospital
2. Cobre Valley Community Hospital to Banner Baywood Heart Hospital
3. Banner Baywood Heart Hospital to Williams Gateway Airport
4. Williams Gateway Airport

No issues from Flight Management System (FMS) within OCC for Segment 1, common alerts for segments 2 & 3 are over 4 nm deviation alert. Segment 4, EnR Post, flight plan goes away in FMS, aircraft continues to display in FMS as a “ghost” while receiving satellite tracking data. All aircraft displayed generates alerts associated with that aircraft and flight plan. However once an aircraft becomes a “ghost” one alert that is lacking is the overdue alert, which is generated at 15 minutes and is displayed as a ring around that aircraft. This overdue ring will continue to expand every minute.

When aircraft has no satellite signal and has no flight plan generated no aircraft will display in FMS.
