Re: San Bruno GT Line Incident - NTSB Investigation

Dear Ravi and Sunil:

Attached in this email is a data response for the following request. On Friday, July 15, 2011, we will send (via FedEx) a DVD with a compilation of all the responses and documentation produced during the week.

NTSB_089-004 Any and all records of overpressure protection setpoints for line 132 that predate the October 1968 record used to establish the current MAOP.

Very truly yours,

-
/GEC

William D. Hayes

Data Response**

PG&E Data Request No.:	NTSB 089-004		
PG&E File Name:	San Bruno GT Line Incident DR_NTSB_089-004		
Request Date:	June 29, 2011	Requesting Party:	NTSB
Date Sent:	July 12, 2011	Requestor:	Operations (Chhatre/Hall)

QUESTION 4

Any and all records of overpressure protection setpoints for line 132 that predate the October 1968 record used to establish the current MAOP.

ANSWER 4

PG&E has conducted a diligent search for pre-October 1968 records regarding overpressure protection setpoints but has not located documents responsive to the request.

Given the breadth of the request and the extremely short response time allowed, PG&E has not been able to conduct an exhaustive records search and cannot confidently assert that it has no potentially responsive documents.
