NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On 08/29/17 around 1:30PM I was flying with my student Ben Gotts, practicing quick stops on taxi way M south of J. After completing a well performed qick stop heading south into the wind (190@7) I had Ben come into a 2-3ft hover and pedal turn facing north on the taxi way over the center line. This was the third or forth time we had done this same procedure. Ben slowly started to accelerate to the north with the wind at his tail on taxi way M. As he started moving forward the helicopter had a fast yaw to the right that was startling but was recoverd with quick pedal inputs. We stopped all foward movement and came back into a hover as Ben asked me what had happed. I told him that it was probably weather cocking because of the tail wind. We checked the gauges everything seemed to be okay and there were no unusual vibrations from where I was sitting with my hands and feet off of the controls. So, we began to accelerate again to the north. This time, right as the helicopter felt as if it were going into ETL the helicopter spun quite abruptly to the right. I immediatley grabbed controls as we were spinning and said "I have controls" and felt as if I had to wrestle the controls out of Ben's hands. I noticed the RPMs were high around 106-107%. So I started to roll down the throttle and started to level the helicopter knowing that we were about to contact the ground with the combination of loss of RPM and airspeed. We hit the ground level but backwards and slide down the taxi way about 6-8ft and came to a stop. After shutting down the helicopter we got out and inspected for damage.
