RE: BIRD STRIKE @ NIGHT......"INCIDENT", 18 November 2017, KCIC.

Dear Sir or Madam,

On Saturday, November 18^{th} , 2017 at ~ 1650 PST, our rented Cessna 172 (N9678Q) was impacted by a goose and blew out the plexiglass windscreen and we immediately returned back to the departing airport, without further damage to the aircraft, and only minor injuries to both myself and my student pilot.

We completed a Strike Report (2017-11-20-161829-R-2) and subsequently had brief telephone conversations with both the FAA and NTSB. Several days later a phone message from an NTSB official from the LA office asked me to fill out an Incident Report, which I presume is the one enclosed.

Any further questions will be gladly provided.

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Due to the BIRD STRIKE (Tundra Bean Goose) the Windscreen was shattered with over 80% of the plexiglass gone. According to the A & P/I-A at Northgate Aviation (KCIC's FBO), both the Windscreen and Glideslope Antenna was badly damaged or destroyed. In addition, as yet to be determine whether the Propeller was damaged in this "INCIDENT". The sun visors & interior plastic panels shows damages, especially in the AFT portion of the cabin. Blood stains were everywhere and unfortunately the FBO had it mostly cleaned up before the following morning.....only residues are seen in some areas where the blood was imbedded in the broken panels especially under the rear windows (above the baggage compartment).

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

At 1835 PST my student pilot and I were to undertake the last portion of his night flying training, completing his +3 hours of night along with the 10 landings at night. Our goal was to do a Night X-C to O41, over 55 NM south of KCIC, our departing airport. TWR cleared us for departure and requested depart via a Right Downwind Departure and then On-Course. The student pilot was performing all of the functions as PIC, his CFI was along on this flight as his backup and to perform all the radio and transponder frequency changes.

Once we cleared Class Delta of KCIC, We switched frequency to 122.6 to open the VFR Flight Plan and finally switched radio frequency again to NorCal Approach on 125.4, who gave us a Squawk Code.....and now seeing that we were LEVEL at 3,500', approximately 8/10 miles South of Chico, I simultaneously heard a bang, boom, crashing sound, commencing from outside of my headset and felt the sudden changes of Temperature, Wind, & Pressure against my body. For only that split moment I also felt pain in my upper chest (when I discovered only later) that sharp pieces of broken plexiglass had puncture my skin at the time of the explosive impact.

It took me more than several seconds to realize that something has hit our airplane, that we were still in flight and mostly level, with the Student Pilot still in control, even though I saw the darkness of blood as it was shining onto his forehead from the Red Overhead Dome light. Again, later, what I saw the the after-effects of the Goose blood that had splattered deeply in a streak across his forehead and going back laterally towards the side of his head, just above his ear. Regardless, at this point the airplane and the Student Pilot were both still intact (RPM, Airspeed, Altitude, VSI, Oil Pressure and Temp) and as it should be.

By this time I saw the student pilot did not have his headset any longer and that the wind within the cabin was now at a level we could not communicate to each other, other than with hand signals and for me to change the codes to 7700, make a 180 turn, and recontact the TWR.

By 1850 PST, we were headed back to the Airport, and I was finally able to talk to the TWR through my mike that was totally being distorted by the open cockpit. "9678-Quebec has an emergency and return......I think we had a Bird Strike; two individuals aboard and my student pilot seems to have lacerations above and around his forehead. Aircraft seems stable. Request medical assistance." From Startup to Shutdown, the entire incident unfolded within this 0.5 hrs as recorded on the Hobbs. This entire, abbreviate X-C flight was totally handled by the Student Pilot, even though he had lacerations on his forehead and that he could not communicate with me nor the outside world. Once we landed, the EMT and fire trucks mets us at the Ramp, next to the FBO--Northgate. We were checked out by the EMT, and I mentioned to the Student Pilot that he needed to close Our Flight Plan with FSS.

We were lucky as the fragments of the Goose skimmed the right temple of My Student Pilot which also quickly and suddenly removing his headset. Other than the broken plexiglass that caused puncture wounds on his head and neck, all I had was only one moderately deep wound to my chest. Several millimeters either side of US and the Goose could have produce an outcome much different than as it did. It ended well and we both learned another lesson or two about RISK Management, about the migratory season, and that it will be much safer to do such training in any other season, but NOW......and through winter.

RECOMMENDATION (How could	d this accident/incident have been pro	evented?)					
Operator/Owner Safety Recommendation							
FAA requires night flight training for the Private Pilot rating. It would be safe to say that once Duck Season commences, Night X-C flight should be postponed to spring. Also, possibly flying on a windy night could have kept the Birds closer to the ground, but from my subsequent research since this incident, this is not a guarantee either.
