Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft destroyed. Center pivot irrigation system, destroyed, JET-A spill, approx 25-40 gallons

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The day started at 9:18 AM local. I was making a herbicide application. I took out five loads and flew until 13:25 local. I was needing a NE wind to finish the job. At 14:01 local, the grower called and indicated the wind had switched to the NE. I proceeded to load the aircraft with 200 gallons of spray mixture and proceeded to the field to finish the job. I finished the job and headed back to KHRI.

Then at approximately 2:53 PM local time 4250x impacted terrain due to loss of control in flight. Impact point approximately 45 49' 11.88" N 109 16' 50.53" W

I was on final for runway 5, at KHRI

I started applying flaps, and due to a distraction in the cockpit (spray handle open, due to vibration), I took my hand off control stick, and due to improper trim input, the plane pitched down severely. I was able to bring the nose back to level, or slightly raised, before the main gear impacted the ground in a plowed field. The marks indicated the RH tire touched first, followed by the LH tire about five feet later. The plane bounced into a center pivot irrigation system catching the RH main gear, tearing it off, and spinning the airplane, with the nose in a westerly direction, before coming to rest on the ground.

The airplane had approximately 25 -40 gallons of JET -A fuel on board, and estimating 5 ounces of round up powermax herbicide.

I was able to get out of the airplane on my own.

No post-crash fires.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

No matter how well your airplane flies hands off, never remove your hand from the stick.
