

RECORD OF CONVERSATION

Samantha Link
Aviation Accident Investigator
Western Pacific Region

Date: September 22, 2019
Person Contacted: Mr. Charles Olvis (NTSB Transportation Safety Specialist - ATC)
NTSB Accident Number: WPR19FA263

Narrative:

During a conversation with Mr Olvis, he reported the following:

- Air Traffic Control (ATC) services were provided by Northern California TRACON and Oakland ARTCC.
- When N1891X was northeast of the Carson Airport (CXP), he established ATC communication and requested VFR flight Following to the Nampa Municipal Airport. Communication was established and the airplane continued to it's destination.
- When the airplane was north of Reno, Nevada, the ATC Controller observed the airplane enter a right turn and reverse course. He asked the pilot if he was returning to the Reno/Tahoe International Airport, to which there was no response.
- The ATC Controller attempted to re-establish communication with the airplane, including relaying through another airplane, but to no avail.
- An alert notice (ALNOT) was established for a missing airplane about 20 minutes after the loss of radar contact.

END.
