Notes

Title: Response Notes

Dispatched to reported MVC with injuries and vehicle fire. 1244 responded, and advised smoke showing from Station 4. 1244 arrived on scene, advised working vehicle fire with a multiple vehicle MVC including a tractor trailer. 1214 assumed command and requested additional ambulances and EMS supervisors. Command advised multiple fatalities. Numerous other TCFD units arrived on scene along with Chattanooga Fire Squad 7 and Quint 7. 1203 arrived shortly after 1244 and assumed command of the scene with 1214 moving to Operations. Fire was extinguished on one passenger vehicle and multiple victims were triaged along the barrier wall. Extricated one injured party from a red pickup truck sitting crossways near the middle northbound lanes.

EMS supervisor requested one medically trained firefighter to ride along with HCEMS Medic 3 to assist with critical patient.

After all injured parties had been transported, and in conjunction with law enforcement (Chattanooga PD, Tennessee Highway Patrol, Hamilton Co. Sheriff's Dept.), and count of the victims was taken:

Victim #1 - Occupant of Mazda SUV impacted at front of tractor trailer.

Victim #2 - Ejected party of Scion

Victims #3-5 - Occupants of Scion

Victim #6 - Occupant of Toyota Prius

At this point, fire personnel moved to sideline to allow law enforcement to complete their investigation of the scene.

At 0308 hours, received clearance from law enforcement to begin extrication of the victims. TCFD extricated victims 3,4,5, & 6, while Chattanooga FD extricated victim #1. All extrications were completed at 0429 hours. Scene was turned over to law enforcement and command terminated at 0457 hours.

Incident Narrative

S7 and Q7 were dispatched to I-75n at Lee Hwy. on a multi-car accident, along with TriComm fire. While in route TriComm arrived on scene first and established command. Q7 and S7 arrived on scene and was advised by command to assist with patient care and possible extrication of one person. Q7 assisted with patient care and S7 started gathering equipment for extrication. Capt. [REDACTED] checked with EMS supervisor on trapped patient for extrication. EMS stated patient was not trapped. Capt. [REDACTED] advised command (Assist. Chief [REDACTED] - TriComm) that patient was trapped and Squad 13 could be canceled. Command requested for S7 to verify that only one person was in the black car up next to the center wall. Two car seats were spotted inside car with the deceased driver. S7 used extrication tools to force open and remove pieces of the passenger side of the car to check for possible victims. No one else was found in the car except for the driver. Capt. [REDACTED] advised command of our findings. S7 was then advised to dress down and standby for further assignment.

S7 was requested to move our truck to the far side of the incident so PD could perform their investigations. S7 picked up our tools and moved the truck down passed the tractor trailer. We turned the truck around to be able to use our onboard lights to assist with the investigation.

S7 was assigned body recover from the car on the front of the tractor trailer. We used extrication tools to remove and displace parts of the car in order to remove the driver. Once the driver was out, we also displaced car structures to check all void spaces for other victims. No one else was found in the car. S7 gathered up all equipment and was released by command.
