

REAR SPAR - WING CENTER TANK

CW-1018
Z-2766
GREEN

This piece of upper spar chord and web extends from LBL 60 to the LBL 75 stiffener.

The web measures 9" high and 18" wide and is still attached to the upper spar chord and attachment to the sloping pressure deck. The stiffener at LBL 63 has separated and is on CW-1019. The fasteners failed in tension. The upper 7" of the stiffener at LBL 75 is still attached. Only the vertical flange of the upper rear spar chord still remains. The fuel tank sealant on the fwd side of the segment remains intact.

There is soot deposits on the aft side of this segment. See Fire and Explosion Group notes for complete definitions.
