

UPPER SKIN PANEL - WING CENTER TANK

CW-106
C-2007
GREEN

This is a section of the skin flange portion of the double plus chord and the skin that extends from S-2 to S-8 and from the left SOB to LBL 111. It contains a portion of the stringer end fittings at S-2 and S-7. It exhibits chord wise (fore and aft) curvature with the fwd and aft edges bent down. The fractures are all ductile with no evidence of pre-existing corrosion. The fracture line of the double plus chord mates with LW-7.

See Fire and Explosion Group notes for further documentation.
