

UPPER SKIN PANEL - WING CENTER TANK

CW-108

C-2027

GREEN

This is a small portion of double plus chord skin flange, upper skin, and upper mid spar chord. The location is at LBL 127.5 and mid spar. The skin measures approx 10" (fwd/aft) X 29" (inb'd/outb'd).

The skin panel remained relatively flat except at the inbd end which has the upper side twisted fwd. the inbd end also contains small portion of the upper and lower tension fitting common to LBL 98 floor beam and MS. A portion of stringer and splice fitting remains attached.

See Fire and Explosion Group notes for further documentation.
