

BODY BUTTLINE 0.00 RIB - WING CENTER TANK

CW-1102  
C-2077  
GREEN

This is a small segment of the body buttline 0 rib. The part is approximately 12"x26". It extends from the rear spar forward about 12 inches and mates with cw-1003, and vertically goes from the upper chord of the rib down 26 inches (about 2/3 of the rear spar depth).

This piece is a web with one vertical stiffener, the web flange of the aft rib post and two horizontal stiffeners. There are two holes in the part with ring doublers to allow fuel tube pass through.

There is soot on both sides of the part. See the Fire and Explosion Group notes for a more detailed description.
