

UPPER SKIN PANEL - WING CENTER TANK

CW-112	CW-130
C-2229	Z-2507
GREEN	GREEN
At S-21-22	At S-21

These are two pieces of skin panel each of which measures approx 10" (fwd/aft) X 24" (inb'd/outb'd). CW-130 has a small portion of the S-21 skin flange attached.

CW-112 spans LBL 98, but does not have any portion of the LBL 98 floor beam attached. CW-130 has the lower chord of the LBL 75.9 floor beam still attached. The outb'd edge of CW-112 is curled up 30 degrees on a 10" radius and the outb'd edge has a jagged fracture with multiple delaminations of the skin. CW-130 has a 30 degree bend with the center bent down relative to the inb'd and outb'd ends. The forward fracture edge of CW-112 is through the fastener line at S-22.

See Fire and Explosion Group notes for further documentation.
