

UPPER SKIN PANEL - WING CENTER TANK

CW-113

C-2233

GREEN

This is a small 5" x 20" (inb'd/outb'd) piece of upper skin panel and skin flange of the midspar upper chord that remains attached to the midspar (CW-817) by the tension bolt and fitting at the LBL 75.9 floor beam location. A portion of the lower tension fitting remains attached but the upper tension fitting is not attached. The piece of skin is flat and all of the fasteners common to the skin flange of the midspar chord are intact.

See Fire and Explosion Group notes for further documentation.
