

UPPER SKIN PANEL - WING CENTER TANK

CW-120 CW-121
C-2327 C-413
GREEN GREEN

CW-120 is a portion of the left hand upper double plus chord and skin that extends from S-29 to the front spar. The skin is approx the same width as the chord. It also includes the front spar external splice plate. The fwd end is bent down and the aft end is twisted up on the inbd edge.

CW-121 is a portion of skin panel that is 9"(fwd/aft) X 25"(inb'd/outb'd) centered about S-30 that mates with CW-120 on its outb'd end. This piece matches the general spanwise curvature of CW-114 except the outb'd end common to CW-120 is curled up and is spalled(delaminated). S-30 is no longer attached to this panel.

See Fire and Explosion Group notes for further documentation on both of the above.
