

LOWER SKIN PANEL - WING CENTER TANK

CW-223  
C-2168  
GREEN

This is a piece of lower skin panel that is 6" x 25" that is attached to the lower rear spar chord and right hand rear spar terminal fitting at RBL 127.5.

The inb'd fracture edge is twisted upwards and aft. Generally all fasteners remain intact. The center section lower skin and spar chord remain attached and intact at the lower external splice plate but the outb'd wing lower skin and spar chord attached to this segment is separated at the aft edge from the external splice plate and the fasteners common to this joint are deformed upwards and outb'd.

No soot on the interior and some sooting on the exterior. See the Fire and Explosion Group notes for further documentation.
