

LOWER SKIN PANEL - WING CENTER TANK

CW-225	CW-226	CW-228
Z-2756	Z-2709	Z-2710
GREEN	GREEN	GREEN

These are 3 small pieces of skin panel all measuring approx 16" X 20". Refer to plan view diagram for size and location. The only portion of stringer remained attached is the skin flange of the splice stringer of CW-225 and CW-228.

There are impact marks on the interior of CW-225 and CW-226. The fastener holes common to the mid spar on CW-226 exhibit fwd and slightly inb'd elongation. The outb'd edge of CW-226 which mates with CW-225 is deflected downwards at approx. 90 degrees angle. All parts exhibit small curvature in multiple directions.

There is evidence of sooting on both inside and outside surfaces. See the Fire and Explosion Group notes for further documentation.
