

CW-504A FRONT SPAR
C-2108
GREEN

This is a small piece of front spar section with a piece of web attached to the stiffener and intercostal. The web has holes where the ring chord was attached. The location is LBL 114.93.

There is evidence of sooting on the web and stiffener web. The stiffener upper web is bent slightly inboard at the bottom.

See Fire & Explosion Group Notes For Documentation.
