

SPANWISE BEAM #1 - WING CENTER TANK

CW-905
C-2107
GREEN

This is a small section which consists of the lower 10" of SWB web between LBL 98 and 106. It also contains the lower intercostal at BL 98.6. The intercostal extends fwd of the SWB1 about 18". It also contains 9" of the upper chord of the intercostal aft of the beam.

The lower shear tie common to the stiffener and intercostal remains attached and the fasteners are missing from the shear tie. The forward intercostal exhibits evidence of fire damage which is heavier on the inboard side as compared to the outboard side. See fire and explosion group notes for documentation.
