

LOG # LF98

TARGET # _____

COORD: LAT _____

LONG _____

DEBRIS FIELD RED

(near field)

ID# 11-29-96-162

Fuselage skin STA 800-807
between S-40L and S-42L.

Small portion of fuselage skin from near debris field that fits in between three previously recovered segments. A fairing attachment clevis remains attached to the skin. All other holes are broken through or open. The holes common to S-41L are pulled inboard slightly.

There is no evidence of sooting or fire damage.
