

Survival Factors Attachment 1
HWY-07-MH-025
Minneapolis, MN

The following pages contain a listing of vehicles and associated equipment that were on the I-35W bridge at the time of the collapse. The listing is in order of vehicle identification number. Generally, A vehicles were located south of Pier 6, B vehicles were located in the central span of the bridge between Pier 6 and Pier 7, C and E vehicles were located north of Pier 7, and D vehicles were recovered from the river. Construction workers on the bridge were identified with a P (pedestrian) designation. Two of these pedestrians (P3 and P14) were later found to have been inside vehicle A10 at the time of the collapse.

(5 pages)
