EDS Area

- 1- 10V @ 50uA = 200 Kiloohms
- 2- 10V @ 100uA = 100 Kiloohms
- 3- 10V @ 1uA = 10 Megohms

70 F, 30% RH

Instruments: Keithley 2001 multimeter, HP6227B dc power supply

Systems 9 - Exhibit No. 9B - Photo 55. Figure 55g. The resistance of the residue was determined by applying a 10 volt dc source and measuring the current. The readings were unstable and the above values were maximum current measurements.
