Re: Motorcoach Railroad Grade Crossing Crash
March 7, 2017
Biloxi, MS

Mr. Hotard,

Enclosed are copies of each draft group chairman factual report in the above-referenced investigation, for your technical review and comment. The deadline for submitting comments is **October 23, 2017**. The NTSB investigative team will review all factual comments and provide the parties with a written summary of the disposition of those comments, including whether any changes have been or will be made to group chairman factual reports. In addition to any comments you may have on the draft reports, please also indicate whether you believe any additional investigation is needed to complete the factual record.

The purpose of a technical review is to verify the accuracy and completeness of the factual information on which the analysis will be based. We are inviting factual comments only, not analytical comments or editorial suggestions. After the technical review, you will have an opportunity to submit a party submission in which you may offer your analysis, including proposed conclusions, probable cause, and recommendations. We will set the due date for party submissions after the technical review.

Please remember that draft factual reports are for official use only until released in the public docket, and NTSB regulations prohibit the release of investigative information that has not been released by the NTSB without prior consultation and approval of the Investigator-in-Charge (IIC). Please feel free to contact me at [REDACTED] or e-mail me at [REDACTED] if you have any questions regarding the technical review process.

Respectfully,
Peter Kotowski, Investigator-in-Charge

Mr. Stubbs,

Enclosed are copies of each draft group chairman factual report in the above-referenced investigation, for your technical review and comment. The deadline for submitting comments is **November 10, 2017**. The NTSB investigative team will review all factual comments and provide the parties with a written summary of the disposition of those comments, including whether any changes have been or will be made to group chairman factual reports. In addition to any comments you may have on the draft reports, please also indicate whether you believe any additional investigation is needed to complete the factual record.

The purpose of a technical review is to verify the accuracy and completeness of the factual information on which the analysis will be based. We are inviting factual comments only, not analytical comments or editorial suggestions. After the technical review, you will have an opportunity to submit a party submission in which you may offer your analysis, including proposed conclusions, probable cause, and recommendations. We will set the due date for party submissions after the technical review.

Please remember that draft factual reports are for official use only until released in the public docket, and NTSB regulations prohibit the release of investigative information that has not been released by the NTSB without prior consultation and approval of the Investigator-in-Charge (IIC).
