

**Docket No. SA-520**

**Exhibit No. 4-H**

**NATIONAL TRANSPORTATION SAFETY BOARD**

Washington, D. C .

**Statements of  
7 Additional Persons**

(1 Page)

**ADDITIONAL PERSONS INTERVIEWED  
SUMMARY OF STATEMENTS**

1. Ken Maffei, [REDACTED] Simi Valley, CA 93065

I saw an aircraft at 1555 PST. I am positive about the time. I saw the aircraft from my location near the intersection of Las Posas and University, in the city of Camarillo.

2. Lorraine Stalberg

Between approximately 1530 and 1600, I noticed an airplane that seemed to be looming. It was very close and low to my location. It was off kilter and seemed to be sliding sideways and descending. I made this observation from my location in the Big Rock area of Malibu.

3. Pam Adams, [REDACTED], Bishop, CA 93514

At approximately 1605 I heard a crunching sound that startled me. I looked up and saw an aircraft from my location in Chatsworth. The airplane was very high and was in a descending attitude.

4. Jim Watson, [REDACTED] Avalon, CA 90704

Between 1600 and 1630 I heard a jet aircraft overhead flying in a north, northwest direction. The engines were on the tail. There was nothing wrong at the time. It looked like it was in a slow descent into Los Angeles International Airport, and that was unusual from my vantage point.

5. Maury Croskery, [REDACTED] Thousand Oaks, CA 91360

From my home I saw a white aircraft flying high and slowing down. I am sure it was a DC-9 type of airplane, and nothing was unusual except it looked like it was heading toward Pt.Mugu.

6. Brian Dunn, [REDACTED] Camarillo, CA

Between 1600 and 1700 I saw an aircraft from my Camarillo residence. The aircraft was close enough for me to recognize that it had two engines and was a MD80.

7. Rubin Burboa, [REDACTED] Port Hueneme, CA

Between 1615 and 1625 I was located at [REDACTED] in Oxnard, and I had a clear view of the ocean. I did not hear anything. I saw a big splash. It may have been from a whale or an airplane.
