FAA Aviation Safety Inspector
Orlando FSDO

Respected Sir,

On January 8th of 2020 I was involved in an aircraft incident. After completing my preflight duties and aircraft inspection I contacted ground control to taxi to the runway. When I reached the runup area for runway 6 I parked in the middle of the runup area next to another aircraft doing runup. While doing my runup an aircraft approached from the taxiway on the right to pass me. As the aircraft passed me its left wing struck my propeller and caused damage to both aircraft. After this happened I contacted ground control to tell them I could not take off and could not move because of the damage. Then instructor Yusef came to help me in a truck.

Please let me know if you need any additional information.

Sincerely,

Two black rectangular redaction boxes covering the signature and name of the sender.
