We, (my coworkers and I) began the day around 8:30am working at the Restoration Site owned by Evergreen Environmental. It is a field about a 1/4 mile down the road from the crash site. We were standing along the fence collecting tree tubes to bring back to the parking area. Another coworker (Eric Foley) was fixing stakes for the tree tubes along the northern border of the site. The morning was drizzling, overcast skies, with a somewhat low cloud ceiling, gentle breeze. Around 9am; even a tad before, we started hearing this plane, not a big plane, that was flying really low to the ground. It was incredibly odd hearing a plane fly that low. We knew there was an air field nearby, for we were used to low-flying planes; but this was exceptionally low. The plane sounded like

it was having trouble reving up the engines, like keeping it airborne was difficult. It sounded like it made ~~one pass~~ <sup>one pass</sup> over our site, like turning around, as small planes often have done that before, <sup>over that area</sup> I must admit for part of this I was standing below some trees so I did not see the first pass, but we could tell it was directly above us. My coworker and I staired at

each other for a moment and then we ran to the fence line, since we were outside the fence next to the door to get in to the site. As we were heading to the fence, we could see the plane make a pass over the site; make <sup>turn</sup> toward the northern fence, where our coworker was (Eric Eley); it then turned, flew over the tree line and coming down at an awful angle;

like it was trying to land <sup>but</sup> the angle was too steep. We then heard ~~the~~ two  
thumbs like it hit trees and then crashed into the ground. When it  
was coming down, we missed where it landed for a few branches above  
us got in our line of site. We then saw our coworker running across  
the site. My coworker and I were a little concerned for we didn't know  
what had just completely happened and didn't know if the pilot was okay.  
I called my coworker (Eric Foley) at 9:08am and the phone call lasted  
only a couple of minutes for he was going to go down the road <sup>in the company truck</sup> to  
see what happened and if he could help. My coworker and I went back  
to the parking area and then walked to Smithville-Jacksonville Rd where we  
met up with an unknown vehicle (no markings on vehicle) and two people in  
uniform who we told that we just saw a plane crash.

At 1165 Smithville - Jacksonville Rd today myself and my co-workers witnessed a plane flying low over head and eventually crashing. From my vantage point I first heard a plane flying overhead. It flew by me and within 10-15 seconds the plane had turned around again and I saw it flying tilted to the left, where it flew out of sight. I heard a dull crash like sound just after I stopped seeing the plane. I stopped what I was

working on and decided to run back to  
our work truck. As I ran across the field  
my co-worker Jennifer called me at 9:08.  
asking me if there had just been a  
plane crash. We were located in different  
locations in the field. I was in the northern  
corner while they were in the southwest.  
(As the plane had flown overhead I did  
not see any smoke.)  
Upon returning to the truck I left our

Site and turned left. I parked on the  
next road to the left. I walked down  
Smithville - Jacksonville Rd and saw cars  
parked in both lanes with debris in  
the road. The line of debris and visible  
damage to the ground and trees started  
to the left side of the road about 50'  
inside a field. From there the debris go through  
a tree line, across the road, into more trees  
and into another field. I asked the

by standers if anyone had gone out to see if  
anyone needed help at the crash site.  
They said no one had gone out. I  
went out with another witness who was  
on the phone with I assume was the  
Police.

Upon coming to the wreckage we each looked  
around to see if we could find survivors.  
with no one outside the plane, we examined  
the plane itself. No smoke or fire.

was seen, but I did smell what I thought  
was fuel. I discovered a body in the tail  
section of the plane. I first saw a hand.

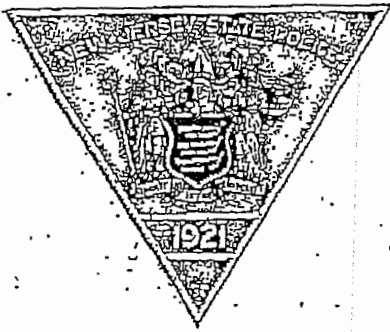

Then a leg upper leg second leg and rest  
of the upper body. I did not see a head. *(All of these were attached to the same body)*

I informed the other ~~with~~ witness on the  
phone I thought this person was dead.

We each left the wreckage site and returned  
to the road. we did not move any wreckage  
pieces, or move or touch the body.

I waited at the road until police and  
EMT personnel arrived. I gave a brief  
statement to an officer. After this I was  
free to go. I returned to my truck  
and drove back to address [REDACTED]  
Smithville - Jacksonville Rd.
