Subject: TOMP_15 Hardspot and MFL analysis

Israel,
Enbridge does not have a hardspot specification/client profile.
Use the same reporting template/criteria for the Hardspot analysis as done in 2011. Identify hardspots with a Brinnell hardness value of 200 or more.

With respect to the MFL data analysis, Enbridge is interested in metal loss feature greater than or equal to 10%.

Please feel free to call me if you have questions.
Thanks.

Integrity is not negotiable.
