Komu: Radim Olbrecht [REDACTED]

- **Aircraft.**

Cessna 172RG Cutlass.

- **Crew**

(Right front Seat) PIC Ignacio Miranda CFI [REDACTED] Exp 03/23

(Left Front Seat) Michael Burger FAA PRIVATE pilot

Passenger

(Rear Right Seat) Zhanyl Aidaralieva, Michael's Wife

- **Route**

KTMB Dct KMTH dct KTMB

- **Weather through the route**

CAVOK

- **Duration of Flight**

2.1 hours.

- **Flight Overview.**

Take off at KTMB at 09:40 AM local time Eastbound after clear KTMB delta Airspace , right turn southbound over the Keys direct to Marathon at 1500 feet MSL. At Marathon, joined left downwind runway seven and performed one touch and go, no issues. After the Touch and go, we flew out of the traffic pattern to the west and proceeded directly over the Florida bay towards KTMB at 1500 feet MSL. At mile 10 Southwest from KTMB we proceed to check with KTMB control tower and be clear to join direct final runway 9R for a full stop. Around 11:46 we performed a normal landing. After touch down we proceeded to press brakes pedals and the left landing gear slowly collapsed rearward and up. Left wing tip touched the runway's surface and by that time directional control of the plane was lost, It slowly slid left towards the grass and fully stopped on the left side of runway nine right.

NO hard Landing, NO injuries, NO propeller strike, NO fire.

Later the plane was pushed up to provide space for the left landing gear to be pulled down with success and the plane was towed back to maintenance.

Report provided by Ignacio Miranda Flight Instructor.
