

**HIGHWAY FACTORS GROUP CHAIRMAN'S
FACTUAL REPORT**

**Highway Attachment – Traffic Volume and Classification Data for
I-65 in Vicinity of Crash Location**

Greenville, Alabama

HWY21MH009

(2 pages)

Provide average daily traffic (ADT) for the last 5 years in the vicinity of the bridge location.

RESPONSE: ALDOT does not retain average daily traffic counts for this location. Additionally, traffic data for this segment of interstate is collected via road-tubes every other year. The Department does not have vehicle classification data; therefore, the data provided is limited to commercial vehicle data which the Department uses for Highway Performance Monitoring System submittals. See annual average daily traffic, which is the average daily traffic volume for a given roadway segment for an annual period, for single unit commercial vehicles (FHWA classes 4-7) and combination unit commercial vehicles (FHWA classes 8-13) from 2016 through 2020 below.

Year	AADT (vehicles)	SU (vehicles)	CU (vehicles)
2020	28,300	1,981	4,811
2019	33,902	2,303	5,594
2018	34,778	2,435	5,913
2017	35,220	2,466	5,988
2016	35,130	2,489	5,972
