### **Where's my VIN?**

Look on the lower left of your car's windshield for your 17-character Vehicle Identification Number. Your VIN is also located on your car's registration card, and it may be shown on your insurance card.

### **What this VIN search tool will show**

- An unrepaired vehicle affected by a vehicle safety recall in the past 15 calendar years
- Vehicle safety recalls from [major light auto automakers, motorcycle manufacturers and some medium/heavy truck manufacturers](#)

### **What this VIN search tool will not show**

- A vehicle with a repaired safety recall. If your vehicle has no unrepaired recalls, you will see the message: "0 Unrepaired recalls associated with this VIN"
- Manufacturer customer service or other nonsafety recall campaign
- International vehicles
- There may be a delay with very recently announced safety recalls for which not all VINs have been identified. VINs are added continuously so please check regularly.
- Safety recalls that are more than 15 years old (except where a manufacturer offers more coverage)
- Safety recalls conducted by small vehicle manufacturers, including some ultra-luxury brands and specialty applications

## **01** Complaints

### **Reporting your problem is the important first step.**

Your complaint will be added to a public NHTSA database after personally identifying information is removed.

If the agency receives similar reports from a number of people about the same product, this could indicate that a safety-related defect may exist that would warrant the opening of an investigation.

## Have a safety problem?

Report a problem with your vehicle, tires, car seats or other equipment. We review every problem as we work to keep our roads safe.

## 02 Investigations

### NHTSA conducts an investigation from reported complaints.

#### A. SCREENING

NHTSA reviews filed complaints from vehicle owners and other information related to alleged defects to decide whether to open an investigation.

#### B. ANALYSIS

NHTSA conducts an analysis of any petitions calling for defect investigations. If the petition is denied, the reasons for the denial are published in the Federal Register.

#### C. INVESTIGATION

NHTSA opens an investigation of alleged safety defects. It is closed when they notify the manufacturer of recall recommendations or they don't identify a safety-related defect. [Monthly investigation reports →](#)

#### D. RECALL MANAGEMENT

NHTSA monitors the effectiveness and management of recalls, including the filing of recall notices with NHTSA, communicating with owners regarding the recalls and tracking the completion rate of each recall. [Data dashboard: Recalls by manufacturer →](#)

## 03 Recalls

### **Initiated safety recalls require a manufacturer's action to announce and remedy the defects.**

A recall is issued when a manufacturer or NHTSA determines that a vehicle, equipment, car seat, or tire creates an unreasonable safety risk or fails to meet minimum safety standards. Most decisions to conduct a recall and remedy a safety defect are made voluntarily by manufacturers prior to any involvement by NHTSA.

Manufacturers are required to fix the problem by repairing it, replacing it, offering a refund, or in rare cases repurchasing the vehicle.

Using our VIN lookup tool, you can access recall information provided by the manufacturer conducting the recall which may be not posted yet on NHTSA's site.

# Roles in the Recall Process

## **Manufacturer**

Manufacturers will notify registered owners by first class mail within 60 days of notifying NHTSA of a recall decision. Manufacture should offer a proper remedy to the owner.

# NHTSA

NHTSA will monitor each safety recall to make sure owners receive safe, free, and effective remedies from manufacturers according to the Safety Act and Federal regulations.

## You (owner)

You'll be notified via mail from the manufacturer. When you receive a notification, follow any interim safety guidance provided by the manufacturer and contact your local dealership to fix the recalled part for free.
