Video Event Recorder (DC3P)

The DriveCam[®] Video Event Recorder leverages predictive analytics to give insight into driving behaviors to help fleets drive more safely and improve operational efficiencies. With an onboard posted speed database, wide angle lens and advanced onboard analytics, the DriveCam Video Event Recorder provides industry-leading risk identification capabilities.

Since 1998, the DriveCam Program has helped more than 500 fleet clients dramatically reduce their operating costs by significantly reducing fuel costs and slashing claims costs by up to 80%. The DriveCam Program identifies unsafe driving behaviors and provides the opportunity to take action before a collision occurs.

The Solution

The DriveCam Video Event Recorder (VER) placed on a vehicle's windshield continuously analyzes traffic activity and drivers' actions, while providing real-time in-cab feedback to help keep your drivers safe.

The VER is continuously recording but not saving. It saves the critical seconds before and after a risky driving event when its embedded sensors are activated by a risky driving event or unusual force, such as hard braking, sudden acceleration, swerving, excessive speed, vehicle impact or other potentially unsafe actions that could lead to a collision.

The event video and data (which includes views of both the road ahead and the driver) is uploaded via the wireless network, to the DriveCam Review Center where certified professionals analyze the events (review, score and comment on each event) for fleet management to use in coaching drivers and improving driver safety.

DC3P Features

The DriveCam Video Event Recorder includes the following features:

- Onboard Posted Speed Database: Captures posted speed events.
- Real-Time In-Cab Feedback: Engage drivers in less risky and more efficient driving.
- Lytx Engine™: By more accurately identifying risk, you can focus on events related to risky driving and avoid sorting through "non-events."
- Intelligent Data Capture: The VER leverages predictive analytics to capture driving behaviors predictive of collisions.
- Exoneration Value: If a collision occurs, the video event recorder captures an unbiased, factual record of the event.
- Wireless Upload: Anytime, anywhere network access and immediate collision upload.
- Telematics: Using GPS, the video event recorder captures location, speed and heading information of recorded events with links to online navigation and mapping services.
- Driver-Activated Event Recorder: Gives drivers the ability to capture events that occur when they happen.
- Hotspot Mapping: Displays clustering of events around particular road hazards – and is included in the cost of the program. Additional location-based services enable route mapping, vehicle tracking, and mileage and exception reporting for location-based risk modeling and driving pattern analysis.
- Driver-Activated Event Recording: Give drivers the control to capture events that occur when they happen.

Fact Sheet

DC3P Product Specifications

General	
Memory available for event and data storage:	Up to 4 GB (more than 400 events)
Horizontal field of view:	130° (internal) / 80° (external)
Diagonal field of view:	152° (internal) / 99° (external)
Accelerometers	3 axis (forward, lateral, vertical)
Manual video trigger:	Yes
Industrial-grade parts:	Yes
Limited warranty:	2 years
Power	
Standard input voltage:	12V or 24V (9V min. to 30V max.)
Power input connector to event recorder:	RJ45 (short body)
Power draw in 12V (cellular not transmitting):	-532mA
Power draw in 12V (cellular transmitting):	-287mA
Power draw in Hibernation Mode (Ignition OFF):	Less than 1mA (can be set per vehicle)
Connectivity	
Wireless (two models):	Cellular: CDMA/Wi-Fi, GSM/Wi-Fi
	(international only)
	Wi-Fi (802.11 b/g)
USB (both models):	USB 2.0 (USB Mini A or Mini B plug)
Advanced Functionality	
Speed, heading and location through GPS:	Yes
Infrared illumination for low light conditions:	Yes
Remote triggering:	Yes (requires standard hub)
Safety Enhancement Mode (SEM) support:	Yes
Input/output connectors for additional functionality:	Yes (requires standard hub)
Environmental	
Dimensions (excludes mounting bracket):	4.5 x 4.3 x 2.1 in. W/H/D (11.4 x 10.9 x 5.3 cm)
Operating temperature:	-40 to 185 °F (-40 to 85 °C)
Weight:	8.3 oz. (235 g)
Event Characteristics	6.6 GL. (200 g)
Average 12 second event file size:	750K – 1.3 MB
Standard resolution:	640 x 360 (230,400 pixels)
Physical Security	
Security screws used to seal unit:	Full coverage
Block to prevent power disconnection:	Yes
Power disconnect reporting:	Yes
Memory format:	NAND
Mounting bracket:	Fixed

+1 (858) 430-4000

At Lytx (formerly DriveCam, Inc.), we harness the power of data to change human behavior and help good companies become even better. Our flagship product, DriveCam powered by Lytx™, sets the standard for driver safety in the industries we serve, and our RAIR™ Compliance Services helps DOT-regulated fleets comply with safety regulations, complementing the DriveCam program. We protect drivers from more than 500 commercial and government fleet clients worldwide who drive more than 20 billion miles annually. Our clients realize tremendous ROI by lowering operating and insurance costs, while achieving greater efficiency and compliance. Most of all, we strive to help save lives – on our roads and in our communities, every day. Lytx is privately held and headquartered in San Diego. For more information, visit www.lytx.com.
